

Other information:

All questions are 4 points for correct answer, 0 for incorrect or blank answer

Answers may not be exact, so **choose the best answer**

The course will be graded pass/fail (bestått/ikke bestått).

This year, in accordance with advice from the NTNU administration, the pass level for the course will be set at the E-level or above. That is, 41% or better will be a pass. You will have to pass both the laboratory section as well as this exam to receive a pass for the course.
